Mr Ridley to you of 26th just received. I find
a very poor specimen of a Scitpus Ill Aug 4 94
named erroneously by Swan. Should you
wish to examine it I will leave it at Mass
Horticultural Soc, or any other place more con-
venient to you, when I come in town the latter part
of the week. Shall look for an additional pleasure
at the next Penn Horse dinner in the hope of
meeting you. Should you be in the vicinity at
any time I would be very glad to meet you

Yrs truly.

Jan. 27/96

Mr. L. L. Dame,

West Medford, Mass.

Dear Sir;- I enclose herewith a list of plants that has been received from Mr. G. F. Perry, 22 Adams Street, Melrose. He has observed all these plants within the limits of the Metropolitan Fells Reservation. If you are doubtful about any of them, please correspond with him. He has not complete specimens of all the plants, but can probably furnish you with sufficient material to identify them,.

Yours truly,
W. H. Manning,

Have asked Dame if Perry is reliable.

Enter these as reported.

List of trees, shrubs, etc. observed by
George F. Perry,
in
Fells Reservation.

Sassafras officinalis
Ilex verticillata
Rhus glabra
Rhus typhina
R. copallina
R. Toxicodendron
Betula excelsa
B. alba var. ?
Berberis vulgaris
Juniperus Virginiana

BOSTON, March 5th, 1896

(General)

Prof. Walter Deane,

9 Brewster Street,

Cambridge, Massachusetts.

Dear Sir:

Your list of the flora of the reservations of this Commission Was presented to this Board by Messrs. Olmsted, Olmsted & Eliot, and I have been instructed to make arrangements for the printing of the same. Would it be convenient for you to call and see me at this office as there are several matters in regard to printing that I should like to consult with you about?

Very truly yours,

John Woodbury.

Secretary.

Dear Mr. Dean;

I have been quite unable to keep my promise in regard to the list of Lending in the inclosed list. But I feel quite confident that you will acquit me of intentional neglect when I mention that my right arm has been blistered and cauterized many times within the last three weeks.

When the list is ready, if it will be convenient,

the proof can be sent to me for correction.
I am now pain the pressure of using my arm, and I shall be very happy to make amends for my delay.

Very sincerely,

Flora W. Patterson.

with [illegible] Agassiz members in regard to the Natural
History of the Indian Reservation. But as it is
can only say now that we already
have from this financial. I had inserted
in our local paper a notice in relation to the
Author, this may reach him.

Nearly all the Tribe visit Lincoln
identified are found in the town, I shall
endeavor during the coming Summer to cover
the whole Eastern Section of the State.

I have an old time-farmer of the Grosvenor
Middlesex Falls, Connecticut to Dr. Lincoln
D. Geneva N.Y. [illegible]
[illegible]
Lincoln has covered the Aboriginal Territory named, he is very thankful, he tells
me time as specified, and is now ready

help me to work perhaps it will aid you.

He is now teaching Botany in Ginn

& Co's text books. (He teaches in Ginn's)

I will [illegible] you specimens when I can

[illegible] I am not [illegible] but will [illegible] them

Dick [illegible] in time perhaps [illegible] will

be pleased at that in time.

I would be pleased and flattered

me to name [illegible] any specimens you may collect

ments who have belonged to Flowering Crypto-

ter. $

I am arranging my Lichens in boxes and

trying to classify them.

The most striking are the;

Umbilicaria, these are best [illegible] specimens, Gyro-

phora found together the Umbilicaria, Mf fruticulo-

ta (?) (?) the Cladonias & have cristatella

fimbriata pyxidata unicialis and two or three uncertain.

There are several of the Parmelia. etc. etc etc

My book [illegible] is arranged thus.

Tribe I

Family Parmeliei

Genus Theloschistes

Species parietina

Locality marblehead mass.
near the Fort.

Thallus foliaceous-reduced.

Surface

Color. Chrome yellow.

Apothecium

disk chrome yellow

Rhizoids many

Spores

Habitat on rocks, [illegible]

[illegible]

I will send you a list. Please
[illegible] whether you want mail
the old or new.
Have [illegible] Brewster - Hotel [illegible]
Regis, Hotel, has [illegible]
new Boston, [illegible]

With best wishes for your success

Yours truly

Lee Phillips.

22 Adams St.
Milton
Mass

Melrose Mass. 11/95

Dear Mr. Manning

I received upon my paper relating to the Flora of the Metropolitan Reservations. I will try and make such use of this as will assist in the work in which upon are engaged. Can I buy one of the maps mentioned?

I am not a botanist but am picking up the names of some of our plants.

One plant found in the Fells is not common, that is Calla palustris, or at least I suppose that is the species name as I find no other Calla mentioned in Gray. I find the same swamp I find Forget-me-nots, and on its banks two years ago I found Adiantum pedatum, but the latter was in an exposed position and probably some one found it.

Is the Cornus alternifolia rare? there is one tree 50 ft. from line of Fells, if the tree is rare I will see if I can find one within the borders of Reservation near the one I mention.

I inclose a list of ferns which we have identified.

Yours truly

Leo F. Sibley.

#22. Adams St.

Work done by George F. Peirce during 1895.

. . . .

This season my investigations have been wholly in the north-east section of the Falls Reservation, that part north of Washington St. and east of Pond St. This takes from Virginia Wood to Doleful Pond. My reason for selecting this part of the Falls, is that most of it is little traveled except in the main paths. I have made it a point to crawl through the densest tangle of Green Brier, and thicker, and it is my object to become familia with every rod of the section named, which comprises about 350 acres.

The first year can only be called a preliminary step, as knowing little or nothing of botany and forestry I was obliged to learn the science (in part), and then catalog every kind of tree, shrub and vine, next year I can make

a systematic collection of the parts of trees at different stages of their growth. The most I have so far collected is leaves.

In addition to collecting and cataloging, I am taking notes on the habitat, the effect of insects and any peculiarity I may notice.

Below is a list of trees, shrubs etc which I have so far identified, and I have the location of each.

Sassafras officinalis.
Ilex verticillata
Pinus glabra
R. typhina
R. Copallina
R. Toxicodendron
Betula excelsa
B. alba var. ?
Berberis vulgaris
Juniperus Virginiana
Pinus strobus
Abies Canadensis

Cornus alternifolia
C. florida
C. stolonifera
Quercus rubra
Q. ilicifolia
Q. bicolor
Q. coccinea
Q. tinctoria
Q. alba
Corylus rostrata
C. Americana
Ostrya Virginica
Castanea sesca
Fagus ferruginea
Viburnum dentatum
V. acerifolium
Sambucus Canadensis
Lonicera sempervirens
Clethra alnifolia
Kalmia angustifolia
Vaccinium corymbosum var. glabrum.
Carya tomentosa
C. alba
C. amara
Robinia Pseudacacia
Myrica cerifera
Comptonia asplenifolia
Fraxinus pubescens.
Platanus occidentalis (2)
Spiraea salicifolia
S. tomentosa

Rosa Carolina ?
R. lucida
Rubus Canadensis.
Pyrus Americana
P. arbutifolia
Rubus villosus
R. strigosus
Cerasus serotina
C. Pennsylvanica
C. Virginiana
Mitchella repens.
Ceanothus Americanus
Populus tremuloides
P. balsamifera
P. grandidenta
Rhus Cynosbati.
R. rubrum
Aesculus Hippocastanum
Acer rubrum
A. dasycarpum
Ulmus Americana
Ampelopsis quinquefolia
Vitis aestivalis ?
Lobelia. cardinalis
Benzoin Odoriferum or Lindera Benzoin.
Humulus Lupulus.
I have a list of several which I want to prove by their fruit. (not named above).

#22 Adams St.
Melrose Mass. 12/95
Mr. H. H. Manning.

Dear Sir

I inclose notes on work performed, and will at once send back the lists and maps which you sent me.

I should be glad to have a letter written, as by that time I may be able to be of some service to you. I shall continue to take notes this fall and winter when the weather is suitable

I am yours truly

Geo. F. Perry.

P.S. Is Castanea sativa correct, it is given on Page 35 of catalog sent me.?

Ferns so far identified by Geo. H. Perry.

Falls Reservation.

Polypodium vulgare	C.
Adiantum pedatum	8 specimens-1 loc.
Pteris aquilina	C
Asplenium Trichomanes	O
A ebeneum	C
A. thelypteroides	C
A. Filix foemina	C
Phegopteris polypodioides.	many 1 locality
P. hexagonoptera.	do.
P. Dryopteris.	do.
Aspidium Thelypteris	C
A. Novaboracense	C
A. spinulosum	C
A. cristatum	C
A. marginale	C
A. acrostichoides	C
Cystopteris fragilis	C in 1 locality.
Onoclea sensibilis	C
Woodsia Ilvensis	C
W. Rufescilobula	C
Osmunda regalis	C
O. Claytoniana	C
O. cinnamomea	C

Botrychium Virginicum f.

Lichens.
Have collected a number and placed in boxes, but am unable to identify them.
Shall I send them to you?

I have found in locality
L 24-25 - a "tree" with bark
like a white birch and leaves
like a red birch.

I have not given you the names
of any of the genus Salix as
I shall have to make a special
study of them, beginning Early
next Spring.

On page #35 of your catalog you give
Castanea sativa var. Americana is
that identical with Castanea ~~vu~~esca
given in Gray?
On page #9 is Psoudacacia spelt correct-
ly?

Dec 27 95

Send Echeveria
W. Drew

#22 Adams St.

Melrose Dec. 2d 1895

Mr. W.H. Manning

Dear Sir;

I am studying trees and shrubs as I have an opportunity so as to prepare myself for neft seasons work.

I have no good work on trees, could you advise me which book to buy, one that is not expensive. (Say $3. or $4.)

Do you know any thing about Chas. S. Newhall's "Trees of N. E America."

As I said at the beginning of this year I cannot promise to do anything, but shall make

an Effort to, going over the same ground again.

I have had not time to pack and send the Lichens to you but they are all packed in small boxes and are safe.

Yours truly

Geo F. Perry
